PROFESSIONAL SUMMARY

Informatics graduate of Sanata Dharma University (GPA 3.41/4.00) with hands-on experience as a web developer building full-stack applications with React.js, PHP, CodeIgniter, Laravel, Flask, and MySQL. Experienced in data analysis and evaluation, including content-based filtering with TF-IDF and Cosine Similarity measured by recall and F1-score, plus SQL and Python. Strong in project support and documentation: gathering requirements, mapping business process flows, documenting progress, and preparing technical handover documents. Completed Data Analysis Fundamental (MySkill) and SAP Overview (SAP University Partnership Program).

SKILLS

Web Development: HTML, CSS, JavaScript, React.js, PHP, CodeIgniter, Laravel (Blade), Flask, Bootstrap, Tailwind CSS, REST API, JWT Authentication

Data Analysis: SQL, MySQL, Python, Data Mining, Machine Learning, Recommender Systems, TF-IDF, Cosine Similarity, Model Evaluation (Recall, F1-Score), Data Visualization (Pie and Bar Charts), Data Analysis Fundamentals

Project Support & Documentation: Requirements Gathering, Technical Documentation, Business Process Analysis, Workflow Mapping, Progress Reporting, Cross-Team Coordination, Event Logistics

Programming Languages: PHP, JavaScript, Python, Java, Kotlin, SQL

Tools & Databases: Git, GitHub, MySQL, SQLite, Firebase (Authentication, Cloud Firestore), XAMPP, SAP/ERP Fundamentals

Languages: Indonesian, English

WORK EXPERIENCE

PT Kanisius - Management Information System (MIS) Division Yogyakarta, Indonesia
Intern, Web Developer (MBKM Program) - HR, Facilities & MIS Aug 2025 - Dec 2025

- Developed an internal employee training platform (LMS-style) with separate employee and admin training-management flows using PHP, CodeIgniter, and MySQL.
- Gathered system requirements and administrative data directly from the HR, Facilities, and MIS teams; wrote requirement notes and documented development progress regularly for the field supervisor.
- Applied software engineering practices from requirements analysis to delivery, and handed over technical documentation and system workflows to the internal team.

Faculty of Informatics, Sanata Dharma University Yogyakarta, Indonesia
Teaching Assistant, Business Process Analysis (CP Class) Even Semester 2025/2026

- Guided students in applying business process analysis methods, including mapping process flows and identifying critical stages.
- Evaluated student assignments and progress, gave feedback, and compiled evaluation summaries as input for lecturer reports.

PROJECTS

MedLink - Web-Based Over-the-Counter (OTC) Drug Recommendation System **2026**
Thesis Project | *React.js, Flask (Python), SQLAlchemy, MySQL*

- Built a web application that recommends OTC drugs from user symptoms using TF-IDF and Cosine Similarity (Content-Based Filtering).
- Evaluated the model with a recall of 100% and an F1-score of 60.88%; usability testing scored above 90.
- Implemented the React.js and Bootstrap frontend, Flask REST backend, JWT authentication, and safety filters based on age, gender, pregnancy status, and medical history.

Expense Tracker - Personal Finance Android App **2026**
Personal Project | *Kotlin, MVVM, SQLite, Firebase*

- Built an Android app to record, monitor, and analyze daily cash flow across multiple wallets using Kotlin, MVVM, and SQLite.
- Implemented category-based transaction logging, pie and bar chart analytics, budget limits with automatic alerts, and PDF report export.
- Integrated Firebase Authentication and Cloud Firestore for login and cloud backup/restore.

Internal Employee Training Platform (PT Kanisius) **2025**

Internship Project | PHP, CodeIgniter, MySQL

- Built an LMS-style training platform with separate employee and admin flows and prepared technical documentation and system workflows for handover.

EDUCATION

Sanata Dharma University Yogyakarta, Indonesia

Bachelor of Informatics (S1 Informatics) Aug 2022 - Jul 2026

- GPA: 3.41/4.00 (Very Satisfactory).
- Thesis: Implementation of a Web-Based Over-the-Counter (OTC) Drug Recommendation System Using Content-Based Filtering.
- Relevant coursework: Software Engineering, Database Concepts and Design, Data Mining, Machine Learning, Recommender Systems, Business Process Analysis, Human-Computer Interaction.

CERTIFICATIONS

- **Data Analysis Fundamental** - MySkill (PT Linimuda Inspirasi Negeri), Sep 2026. Certificate No. 341210/DTA/LM/9/2026.
- **SAP01 - SAP Overview** - SAP University Partnership Program (with Duta Wacana Christian University), Nov 2024. Foundations of ERP systems, project modules, and administrative workflows.

CAMPUS ACTIVITIES

Campus Ministry, Sanata Dharma University Yogyakarta, Indonesia

Equipment Coordinator, Easter Committee Mar 2025 - Apr 2025

- Coordinated equipment and logistics across multiple committee divisions with requirement lists, preparation schedules, and follow-ups with each person in charge, so all preparations were completed on time.
